

# Furnace Test & Tune Program

You may qualify for a free inspection & tune-up of your furnace!

***Mobile & Manufactured Homes NOW ELIGIBLE!***

## Test & Tune Includes:

Following approval into the program, Habitat will have an approved HVAC contractor schedule a tune-up of your furnace. The furnace tune-up service will include, at a minimum, tasks such as:

- ✓ Clean burners, combustion chamber, and heat exchanger surface when accessible
- ✓ Clean and inspect burner orifices and ignition system
- ✓ Check for proper venting and for adequate combustion air (per code)
- ✓ Check and test safety controls
- ✓ Inspect filter, replace standard 1" and 2" filters and/or clean washable filters
- ✓ Run equipment through complete sequence of operation

## Potential Furnace Repair/Replacement:

Pending appropriate analysis by the HVAC contractor, limited repairs exceeding the scope of a normal diagnostic tune-up may be eligible. If your furnace is unsafe or un-repairable, you may qualify for a replacement furnace at a significantly reduced cost.

## FREE Additional Energy Savings Measures Included!

Based on your eligibility, one or more of the following measures may be included with your furnace tune-up.

Programmable Thermostat

Low-flow water saving measures

Up to 20 LED light bulbs
